

WEIGHT DOWN*

A Dietary Supplement to Support Weight Management and Satiety*

Recommended For:

- Weight Management*
- Satiety Support*
- Cardiometabolic Support*
- Free-radical Fighting Support*

DyглоFit[®] is a natural, self-affirmed GRAS, standardized extract of *Dichrostachys glomerata* fruit. This fruit has a long history of use as a culinary spice and for medicinal purposes in West Africa.

Multi-patented **DyглоFit**[®] contains polyphenol bioactives that help provide healthy weight management and metabolic wellness benefits (“weight wellness”) via multiple mechanisms of action including enhancing leptin function.* These types of polyphenols may help enhance insulin sensitivity allowing more blood sugar to be used for energy and less converted to fat.*

DyглоFit[®] bioactives provide superior free-radical fighting protection to support cardiovascular health. Research indicates these types of polyphenols possess properties which help provide resistance to challenges associated with metabolic dysfunction.*

DyглоFit[®] elevates the standard in terms of “weight wellness” nutraceuticals as a result of its multiple mechanisms of action of **DyглоFit**[®] polyphenol bioactive constituents and its convenient delivery system.*

These polyphenols possess mechanisms which include:

- 1) Enhanced insulin sensitivity support*
- 2) Advanced free-radical fighting protection*
- 3) C-Reactive protein support*

The Leptin Connection:

DyглоFit[®] helps support satiety mainly as a result of its influence over leptin functionality. Leptin is a master hormone produced by fat cells that regulates satiety, appetite control, and thermogenesis, and is associated with metabolic rate.*

Polyphenols, like those found in **DyглоFit**[®], may help support healthy levels of C-reactive protein, which can bind with leptin and impair its ability to reach the brain and initiate the signal to the body that it is full.* When the leptin is unbound due to healthy levels of CRP brought about by the polyphenolic compounds found in **DyглоFit**[®], the signaling capability is restored.*

The convenience of a great tasting, sweet mint liquid delivered in a pump format for easy adjustment to the serving size sets the stage for increased compliance and better clinical outcomes.*

Supplement Facts

Serving Size 1 ml (5 sprays) 30 Vegetarian / Gluten Free / Soy Free Servings

Amount Per Serving

DyглоFit [®] <i>Dichrostachys glomerata</i> Fruit Extract	200 mg
Stevia Leaf Extract	5 mg

Other ingredients: glycerin, water, ethyl alcohol, potassium sorbate, peppermint oil.
